

CDTA 2026 Dashboard

Single-page web dashboard for the **Coimbatore District Tennis Association (CDTA) 2026 League** — covering 11 divisions (A through K), 121 teams, ~1,170 players, and 510 matches.

Live site: <http://akilanramesh.com/cdta/> **Repository:** <https://github.com/rameshbala50/cdta> **Source data:** <https://league.cdta.co.in/>

Quick start

Open `index.html` in any modern browser. Everything runs client-side.

Default login (see docs/USER_GUIDE.md for full role list):

Username	Password	Role
rameshadmin	ramesh123	admin (sees everything)
ramesh	ramesh2026	svgplayer (Div I, STARS)

Features

- **11 divisions (A–K)** — standings, schedules, results, player rosters
 - **Overview** — consolidated league dashboard with leaders & league totals
 - **SVG Players** — special club view for the SVG Tennis Club
 - **Player photos** — 1,165 photos stored locally in `photos/div-{a..k}/`
 - **Admin panel** — user management, login history, usage logs, data tools, settings, test plan
 - **Role-based access** — admin / captain / svgplayer / viewer
 - **Auto-recompute** — player stats and partner pair stats are derived from match data on init
-

```

Documentation

Doc	Purpose
docs/FUNCTIONAL_SPEC.md	What the app does — features, pages, user flows
docs/TECHNICAL_SPEC.md	Architecture, key algorithms, data flow
docs/DATA_SCHEMA.md	Structure of <code>data/division-X.js</code> files
docs/USER_GUIDE.md	What each role can do
docs/ADMIN_RUNBOOK.md	Operational tasks: refresh, scrape, troubleshoot
docs/DEPLOYMENT.md	GoDaddy FTP deployment
CHANGELOG.md	Release notes

Tennis terminology (important!)

- **Match** = a team-vs-team fixture (e.g., "PSG-A bt ANUSHAM-A 3-0")
- **Court** = one of 3 doubles games inside a match
- **1 court won = 1 point** earned by the team
- Each week, each team plays for **3 points** (3 courts × 1 pt)

In the data, `played` is in **courts** for divisions A–J and in **matches** for division K (the only exception). The render layer compensates.
